TPCoE training for the EXATEL company

EXATEL

On April 7, 2022 the experts of TPCoE conducted a training on anti-terrorist prevention for the staff of the company Exatel.

The training included a series of presentations on best practices and recommended behaviours in the event of a terrorist incident. The officers of the Centre familiarised the participants with the 4U! social campaign conducted by the TPCoE. They also discussed the issue of proper conduct in a hostage situation.

An important part of the training were also issues concerning the role of information in the process of building security policy of an organization in the context of terrorist threats.

The training was one of the elements of an educational campaign initiated by TPCoE to raise awareness also among telecommunications companies, whose destruction or damage in the aftermath of a terrorist act could have a negative impact on the functioning of

critical infrastructure in our country.
