TPCoE training for the management of the Ministry of Climate and Environment

Minister

On April 5 this year, the experts of TPCoE conducted a training in the Ministry of Climate and Environment on building information security policy and counter-terrorism prevention.

During the meeting, the knowledge in the field of best practices and recommended behaviors in the event of a terrorist incident was conveyed - based on the 4U! social campaign, as well as issues related to building an organization's security policy in the context of existing threats were raised.

The training was a result of an awareness-raising campaign conducted by TPCoE, which also aims to shape cooperation between security structures and government institutions in the process of building a stronger security culture.
