Training at National Atomic Energy Agency

On 2 December 2022, officers of TPCoE conducted a training session on anti-terrorist prevention and information security on the premises of National Atomic Energy Agency's Warsaw headquarters. The meeting was well attended by National Atomic Energy Agency employees.

The training was devoted to discussing the recommended way of behaving (4U! procedure) in the event of a terrorist incident, including a mass murderer attack, the danger of the perpetrators' use of explosive devices, as well as issues related to dangerous shipments.

The training is a continuation of a campaign initiated by TPCoE to raise anti-terrorism awareness among institutions of key importance to the country's energy security.
