## TPCoE training for the National Fund for Environmental Protection and Water Management

On February 10, 2023, TPCoE experts conducted a training for the management and a group of employees of the National Fund for Environmental Protection and Water Management.

The training was devoted to shaping an appropriate information policy in the context of preventing and counteracting terrorism. Issues related to the use of media space by extremists and terrorists to promote their activities and gain supporters were discussed. The key role of state institutions in addressing social problems that can be used for extremist propaganda was indicated. TPCoE experts also presented the recommended methods of conducting crisis communication in the event of a terrorist incident.

The event was the first in a series of trainings in the field of terrorist prevention, which TPCoE will carry out for the National Fund for Environmental Protection and Water Management.
