Training for members of the Polish Chamber of Persons and Property Security

Szkolenie dla członków Polskiej Izby Ochrony

On 29 May 2023, a TPCoE expert conducted a training session for representatives of the Polish Chamber of Persons and Property Security.

During the meeting, issues of information threat prevention were discussed in the context of dangerous contacts that may be made by persons employed in entities affiliated to the above-mentioned organisation.

Participants in the training were particularly drawn to the dangers of attempts by extremist/terrorist organisations to obtain sensitive information. In this context, the meeting was also devoted to issues related to the construction of security policies in self-regulatory entities, as well as the exposure and vulnerability of facilities protected by Chamber members to terrorist or diversionary events.

The meeting was mainly aimed at those in supervisory roles in entities providing services related to the protection of facilities and property.

The event was another such educational initiative for Polish Chamber of Persons and Property Security as part of TPCoE activities on shaping information security policy in the context of counter-terrorism prevention.
