TPCoE training at the company Polskie Elektrownie Jądrowe (PEJ)

On 29 May 2023, a training course for employees and management of the company Polskie Elektrownie Jądrowe took place.

The event was devoted, among other things, to a discussion of the recommended course of conduct in the event of a terrorist incident, including a mass casualty attack, the danger of perpetrators using explosive devices, as well as issues related to dangerous shipments.

The training is an element of the measures taken by TPCoE to raise awareness and build resilience to threats among the personnel of companies of a strategic nature from the point of view of the energy security of the Republic of Poland.
