The conference "Safety is most important – Polish- schooling" for the Delegation of the Board of Education in Rybnik and Bielsko-Biała

On 11 May 2023 in Czerwionka-Leszczyny and on 30 May 2023 in Bielsko-Biała, two recent conferences on safety at schools in the context of terrorist incidents took place.

The event was intended for the staff of the organisational units of the School Superintendent's Office in Katowice within the framework of the project entitled 'Security is most important- Polish-schooling', which is the result of cooperation between TPCoE and the Centre for Security Studies and Education of the University of Wrocław

The conference was attended by principals of public and non-public primary and secondary schools from the Delegations of the Board of Education in Rybnik and Bielsko-Biała. The meeting provided knowledge on best practices and recommended behaviour in the event of a terrorist incident - based on the 4U! social campaign - concerning the activity of a mass murderer, the perpetrator's use of explosives and contamination agents, all in the context of anti-terrorist protection of Polish educational institutions.
