## TPCoE training for the Ministry of the Interior and Administration

Szkolenie CPT ABW dla MSWiA

On June 21, 2023, CPT ABW experts conducted a training course for a group of employees of the Ministry of the Interior and Administration.

The training was devoted to the formation of an appropriate information policy in the context of preventing and countering terrorism. Among other things, they discussed issues related to the use of media space by extremists and terrorists to promote their activities and gain supporters. The key role of state institutions in addressing social problems that can be used for extremist propaganda was pointed out. Recommended methods for conducting crisis communication in the event of a terrorist incident are also presented.
