TPCoE training in Rzeszów

On 24 August 2023, training on counter-terrorism prevention and cyber security was conducted on the premises of the Tax Administration Chamber in Rzeszów.

The meeting was attended by representatives of the Chamber's management and its field offices from the Podkarpackie Voivodeship region. In particular, a discussion was held on the 4U! social campaign promoted by TPCoE, which sets out recommended courses of action in the event of threats of a terrorist nature. Significant attention was paid to the recognition of such situations in public space at their preliminary stage. Subsequently, issues concerning behaviour during the direct occurrence of terrorist events, related, for example, to the so-called dangerous package, were addressed.

The training panel discussed, among other things, the basic types of threats in the infosphere and the principles of safe use of the Internet.
