On 29 August 2023, a TPCoE expert conducted a training session in the auditorium of the Strumienie primary school in Józefów, dedicated to the teachers of the school establishments of the STERNIK Association for the Support of Education and Family.

The event included a discussion of the recommended way of behaviour, the 4U! campaign in the event of a terrorist incident, including a mass murderer attack, the danger of perpetrators using explosives, including elements of the behaviour of perpetrators of attacks, as well as issues related to the notification of

emergency services.

The training reflects the mission of TPCoE to build higher anti-terrorist awareness among the pedagogical and teaching staff of Polish educational and educational institutions.
