## Training on counter-terrorism prevention in Niegowo

Szkolenie z profilaktyki antyterrorystycznej w Niegowie

On 29 August 2023, a training course on school security in the context of terrorist incidents was held in the auditorium of the Municipal Cultural Centre in Niegowo.

The event was one of the outcomes of the conference 'Security is most important - Polish schooling' and covered the process of building information security policy and anti-terrorist prevention.

The meeting provided knowledge on best practices and recommended behaviour in the event of a terrorist incident - based on the 4U! social campaign

The above is an element of the Centre's efforts to shape a culture of security and build anti-terrorist awareness in society, which is also intended to increase the resilience of Polish educational institutions in the face of possible extremist-terrorist threats. The event was attended by dozens of people

involved in education from the Niegowa Municipality and surrounding local government units.
