Training for the Central Informatics Centre

Szkolenie dla Centralnego Ośrodka Informatyki

On 8 November 2023, a training course on anti-terrorist prevention and information security was held at the premises of the Central Informatics Centre in Warsaw.

During the event, a discussion was made, among other things, of the 4U social campaign implemented by TPCoE, which sets out recommended ways of proceeding in the event of threats of a terrorist nature. The recommended ways of proceeding during the direct occurrence of terrorist acts, e.g. coming into contact with an armed perpetrator, were indicated.

The thematic block related to information security addressed, among other things, preferred protection mechanisms in the event of hybrid threats and threats arising from careless use of social media.

The event was part of the promotion of knowledge on security policy-making in the context of terrorist and information threats.
