Training for the General Directorate of National Roads and Motorways

Training for the General
Directorate of National Roads
and Motorways

On 15 October 2024, a CAT ABW expert conducted a training course for employees of the General Directorate of National Roads and Motorways on the subject of terrorist prevention.

The nature of threats to entities of key importance to the Republic of Poland, including transport infrastructure, was indicated. Attention was drawn to the need to recognise all symptoms of terrorist threats and to inform the services of these facts immediately. Also discussed was the 4U! campaign promoted by the ABW, indicating recommended ways of proceeding in the event of the occurrence of a specific crisis situation, e.g. coming into contact with an armed perpetrator or delivery of a dangerous parcel which may contain an explosive charge or a CBRN agent.

The training is an element of a series of educational activities carried out by the ABW for the benefit of raising anti-terrorist awareness of the personnel of state institutions, including improvement of the proper direction of responding to terrorist incidents taking place in the public space.
