Conference of the Polish Air Navigation Services Agency

Conference of the Polish Air
Navigation Services Agency

On 7 November 2024, a conference was organised to raise awareness and ensure security.

In connection with the event, CAT ABW officers conducted training on counter-intelligence prevention and anti-terrorism procedures.

Representatives of the Polish Air Navigation Services Agency attended the event, which was aimed at raising awareness of threats.

Participants had the opportunity to familiarise themselves with a wide range of issues relating to dangerous contacts and the potential areas in which various types of threats may occur in the course of their duties. In particular, there was a focus on the challenges they may face during their day-to-day activities.

The training also discussed recommended behaviour in crisis situations, such as the occurrence of a terrorist event. Special emphasis was placed on strategies to deal with an attack by mass killers and the potential dangers of explosive devices.

Trainees gained knowledge of evacuation procedures, how to respond in the face of an imminent threat and methods to minimise risk in their working environment.
