25th Conference of the Polish Chamber of Protection

25th Conference of the Polish
Chamber of Protection

On 29-30 October 2024, a conference was held to strengthen awareness and ensure the security of critical infrastructure in the face of heightened state threats.

The event was attended by representatives from the security industry, including security company leaders, security professionals and security technology innovators. The conference provided an excellent opportunity to share experiences and best practices in risk management, physical security and information protection.

The subject matter experts invited to the conference shared their knowledge on the latest trends and challenges in the security industry, such as cyber security, real-time monitoring or the use of artificial intelligence in security systems. Through their talks and panel discussions, participants had the chance to better understand the changing needs of the market and how to prepare their businesses for the future.
