Training for the Voivodship Administrative Court in Łódź

Training for the Voivodship
Administrative Court in Łódź

On 9 December, a CAT ABW expert conducted a training course for judges of the Voivodship Administrative Court in Łódź.

In the context of information security issues, contemporary threats caused by the overabundance and massiveness of information against the background of attacks targeting the positive image of an entity were discussed. Furthermore, methods of acquiring information by hostile actors, typical mistakes resulting in the leakage of sensitive data, as well as threats resulting from careless use of social media were presented. Security procedures related to so-called dangerous consignments, which may contain explosives or CBRN agents, are presented, and threats caused by state and non-state actors are characterised.
