Participation of CAT ABW expert in the Forum for the Protection of the Critical Infrastructure of the Financial System

Participation of CAT ABW expert in the Forum for the Protection of the Critical Infrastructure of the Financial System

The event was organised by the Ministry of Finance and was dedicated to operators of the Critical Infrastructure of the Financial System.

The main topic of the CAT ABW expert's speech was issues related to contemporary threats caused by hostile actions in the information area, including threats related to access to unique data in the professional activity environment of the training participants.

The role of information in the context of intelligence-terrorist threats, methods of acquiring knowledge conducive to the planning and preparation of acts of violence and foreign interference, including the typing of possible targets of hybrid threats, were presented. The tools and techniques of attack used in hybrid conflicts were also addressed, and recommended mechanisms for protection against unauthorised attempts to acquire sensitive information were presented.
