Training for PERN S.A. in Warsaw

Training for PERN S.A. in Warsaw

On 4 June 2025, a CAT ABW expert held a specialised training session in Warsaw for PERN S.A. executives on counter-terrorism prevention.

The meeting discussed the most relevant threats to national security in the context of a dynamic and unstable geopolitical situation. Experts emphasised the crucial importance of threat awareness and decision-making and operational preparedness in crisis situations. A special focus was given to the '4U!' public awareness campaign, promoting the principles of proper conduct in the event of a terrorist attack, a suspicious shipment or CBRN threats.

Participants were familiarised with practical response scenarios and risk minimisation procedures. PERN S.A. consistently supports initiatives to increase organisational resilience and improve staff competence in security management.
