The anniversary was a perfect opportunity to present the Recommendations with regard to CT prevention in public administration buildings, which are the guidelines of the Head of ABW in this regard.

The knowledge and guidelines collected by the TP CoE during 9 national meetings with representatives from various governmental institutions were used for the initial identification of the state of security and potential loopholes in the protection system of institutions. Then, the abovementioned recommendations were drafted.

During the event, a CT Awareness Questionnaire was collectively filled in by the attendees. It forms a further element in the strategy of building a bridge between state institutions and the society.

Acknowledging the input of cooperating governmental institutions, experts and academia, the TP CoE would like to thank for their trust and involvement in shaping the security culture of Poland.
